DETAILED ACTION

Claims 1-28 are pending in the instant application.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 15-21, 26-28, drawn to a method for generating a test vector, classified in class 716, subclass 5.
 - II. Claims 8-14, 22-25, drawn to a method for perform word-level ATPG justification on a circuit, classified in class 716, subclass 4.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, although both inventions involve performing word-level ATPG justification, invention I is directed to generating test vectors using word-level ATPG justification and invention II is directed to the steps involved in performing word-level ATPG justification. The inventions therefore have separate utility. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2825
